

Q2B32010500F – QSFP28 Single Fibre / PAM4

Tx 1331nm Rx 1271nm / 10km / 50 Gigabit Ethernet

For your product safety, please read the following information carefully before any manipulation of the transceiver:

ESD

This transceiver is specified as ESD threshold 1kV for SFI pins and 2kV for all others electrical input pins, tested per MIL-STD-883G, Method 3015.4 /JESD22-A114-A (HBM). However, normal ESD precautions are still required during the handling of this module.

LASER SAFETY

This is a Class1 Laser Product according to IEC 60825-1:2007. This product complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated (June 24, 2007).

The optical ports of the module need to be terminated with an optical connector or with a dust plug in order to avoid contamination.

1. Overview

Q2B32010500F is a high performance QSFP28 transceiver module for 50 Gigabit Ethernet data links over a single mode fibre. The maximum reach is 10km. An internal DSP-based gearbox converts the 2 electrical input channels (each 25Gbps NRZ) into one 25GBd PAM4 signal. The transmitter is a 1331nm laser generating the optical 25GBd output signal.

The receiver is a 1271nm PIN Photodiode which detect the 25GBd PAM4 optical input signal. This 25GBd data stream is converted into two 25Gbps electrical output signals by the DSP. Consequently, a module with a 1271nm transmitter and a 1331nm receiver is required at the opposite side of the link. The recommended counterpart is Q2B23010500F.

This transceiver module is compliant with the QSFP28 Multisource Agreement (MSA) and hot pluggable. Always contact Skylane Optics® commercial agents for compatibility with different equipment platforms.
