For your product safety, please read the following information carefully before any manipulation of the transceiver:

## ESD

This transceiver is specified as ESD threshold 1kV for SFI pins and 2kV for all others electrical input pins, tested per MIL-STD-883G, Method 3015.4 / IESD22-A114-A (HBM). However, normal ESD precautions are still required during the handling of this module.

## LASER SAFETY

This is a Class II Laser Product according to IEC 60825-1:2007. This product complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated (June 24, 2007).

The optical ports of the module need to be terminated with an optical connector or with a dust plug in order to avoid contamination.

## 1. Overview

QBPOD040EooF is a high performance QSFP-DD transceiver module for 400 Gigabit Ethernet data links over a single mode fibre pair. The maximum reach is 40km. The eight transmitters are LAN-WDM lasers generating eight optical 25GBd output signals, which are multiplexed together at the optical output port.

The eight receivers are Avalanche Photodiodes (APD) photodiodes which detect (after optical de-multiplexing) eight 25GBd PAM4 optical input signals. These 25GBd data streams are converted into eight corresponding electrical output signals (400GAUI-8).

This transceiver module is compliant with the QSFP-DD Multisource Agreement (MSA) and hot pluggable. Always contact Skylane Optics® commercial agents for compatibility with different equipment platforms.

## 4. Optical Interface

P/N	Wavelength	Protocol	Optical Output Power <sup>1</sup> [dBm]	Stressed Receiver Sensitivity <sup>2</sup> (OMA) [dBm]	Optical Receiver Overload <sup>3</sup> [dBm]	Link Length <sup>2,4</sup> [km]
QBPOD040EooF	1310nm LAN-WDM 800GHz	400GBASE-ER8	8.4 to 14.6	≤ -14.1	-4.4	≤ 40

10. Extinction ratio ≥ 4.5dB
